Create the Analytics View in the ADO Team Project

Purpose

Show how to create an Analytics view for a team and an entire Team Project for current work items. This uses the Azure DevOps Team Project where the demo generator is run to populate the work items.

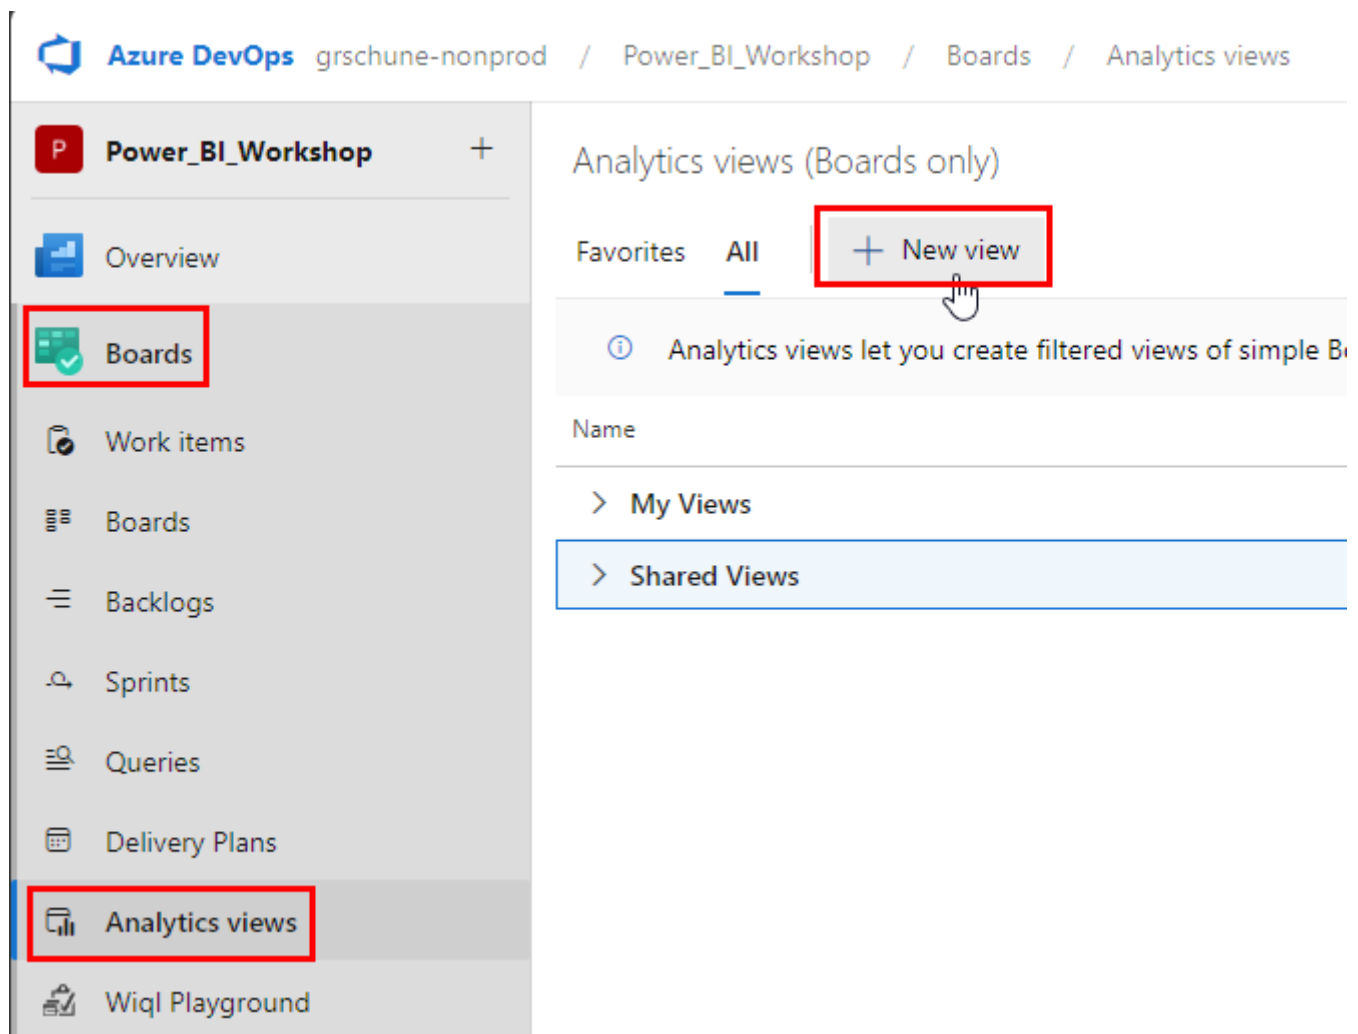

Refer to this document as an example: [Create a Power BI report with an Analytics view - Azure DevOps | Microsoft Learn](#)

PreRequisites

Complete Lab_00_prerequisite.

Create Analytics View

1. In the Boards hub, select **Analytics Views**
2. Select **+ New view**

3. In the Name field enter **All-Current-WorkItems**
4. Keep the Private View option under Sharing
5. Select **Continue** to navigate to the **Work Items** tab

New view

General

Work items

Fields

History

Verification

Description

Enter brief description

Sharing ⓘ

☒ Private view

You're the only one who can see this view and use it in Power BI.

☐ Shared view

All users on your project can see this view and use it in Power BI.

Continue

Cancel

Work items Settings Tab

1. Keep the option to Filter by Team
2. Under Teams, ensure the **All Teams** option is selected. This brings the work items in for all Teams in the Team Project
3. Under **Backlogs and Work Items** select **User Stories** and **Bugs**
4. Select **Continue** to navigate to the **Fields** tab

New view
